About the Canadian HSS Commons

Developed in collaboration with CANARIE, UVic Systems, Compute Canada, the Federation for the Humanities and Social Sciences, and the Modern Language Association.

Through the INKE Partnership, the Canadian HSS Commons is also connected to the Canadian Research Knowledge Network, the Digital Humanities Summer Institute (DHSI), Edith Cowan University, Érudit, Iter: Gateway to the Renaissance, the Public Knowledge Project, and the University of Victoria (UVic) Libraries.

Welcome to the / Bienvenue à le Canadian HSS Commons!

Our mission is to connect and support the work of Humanities and Social Sciences researchers across Canada.

Notre mission est de connecter et de soutenir le travail des chercheurs dans les domaines des Lettres et des sciences sociales au Canada.

Key Features of the Canadian HSS Commons

- Canadian servers and digital research infrastructure
- Built on HubZero; code is open source and available on GitHub
- User profiles with SSO via ORCID and other federated identity services
- Project development environment that integrates with Dropbox, GitHub, Google
- Open access subject repository that assigns DOIs upon upload
- Research sharing and communication tools

Foundations for the Canadian Humanities and Social Sciences Commons: Exploring the Possibilities of Digital Research Communities

Description

This paper introduces the Canadian Humanities and Social Sciences (HSS) Commons, an open online space where Canadian HSS researchers and stakeholders can gather to share information and resources, make connections, and build community. Situated at the intersection of the fields of digital scholarship, open access, digital humanities, and social knowledge creation, the Canadian HSS Commons is being developed as part of a research program investigating how a not-for-profit, community-partnership research commons could benefit the HSS community in Canada. This paper considers an intellectual foundation for conceptualizing the commons, its potential benefits, and its role in the Canadian scholarly publishing ecosystem; it explores how the Canadian HSS Commons' open, community-based platform complements existing research infrastructure serving the Canadian HSS research community.
